

SPECIAL POWER SUPPLY FOR GAS WATER HEATERS

ENERTEC
SPS 320

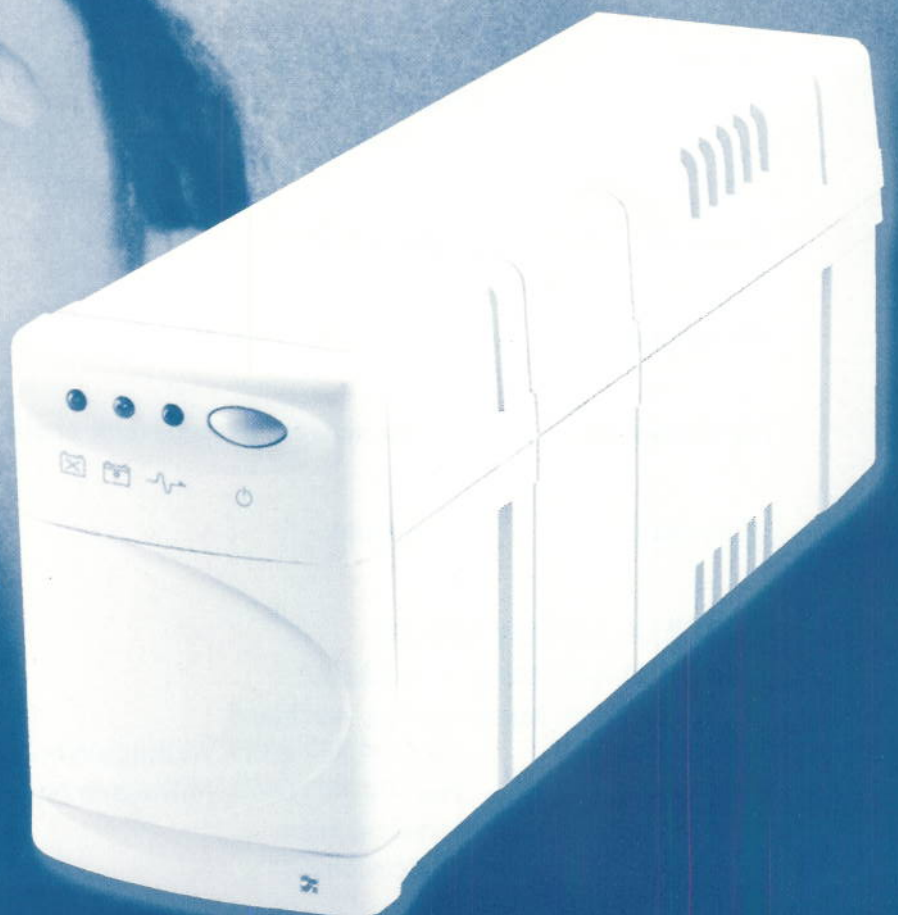

**ENSURE
CONTINUITY
OF HOT WATER
EVEN WHEN
THERE IS
TOTAL POWER
BLACK OUT**

SPS 320 Provides —

- ◆ **Reliable backup power under power blackout conditions**
- ◆ **Reliable backup power under moderate or severe power fluctuations**
- ◆ **Filtering out of spikes and dips in mains power supply at all times**

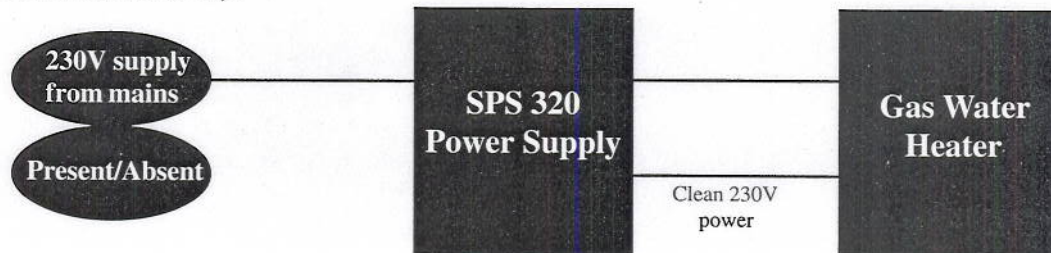

RINNAI

Recommended

Why is SPS 320 Needed?

Gas Water Heaters require electrical power to provide the spark for gas ignition as well as running a small internal fan. In the event of a total power failure (blackout), as there is no electrical power available to ignite the gas, there simply will be no hot water. The Enertec SPS 320 special power supply fills the gap and provides continuous electrical power from its own batteries and inverter to ensure that hot water supply is maintained. When the mains power is restored the SPS 320, apart from cleaning the power charges it's own batteries, keeping them ready for the next power failure (blackout or brownout event).

SPECIFICATIONS:

- Power:** Input: 230V(+/-25%), 50 Hz, single phase
Output: 230V(+/-5%), 50 Hz single phase
- Battery:** Type: sealed lead acid, no maintenance
Typical back up time: 1½ hours
Typical: recharge time: 4 hours
Typical battery life: 3-4 years
- Alarms:** Battery back up on
Battery low
Overload
- Physical:** Weight 4.7kg
- Dimensions:** 97mm (wide), 260mm (depth), 135mm (high)
- Environment:** Location: weatherproof with ventilation and visible front panel
- Warranty:** 12 months
